

**HONDA**

# Lawnmowers

When we designed our range of gardening products we looked at your life from every angle.

Everything we learn from everything we do, goes into the development of our lawn and garden products, allowing us to create new technologies and new ways of solving problems. Not only making them the very best they can be, but making them a joy to use and own. So it's not just clever engineering, it's **ENGINEERING FOR** *Life*

# Lawnmowers

Whatever the size and shape of your garden, we have the perfect lawnmower for you. From our new easy to use cordless range to a wide variety of petrol driven models, perfect for domestic and professional use.

## THE RANGE

## LAWNMOWER FEATURES

### Auto-Choke

The intelligent auto-choke system automatically sets the choke to give optimum starting and running in all conditions.

### Electric Start

The electric key start ignition makes starting your lawnmower even easier and is fitted in addition to the standard recoil pull-start.

### Roto-Stop® Blade Brake Clutch

Stops the blades but leaves the engine running while you empty the grassbag or move across driveways with self-propelled models.

### Rear Roller

Models with a rear roller give your lawn that classic striped effect. A rear roller offers greater machine balance and control when cutting around the edge of your lawn.

### SMART Drive®

SMART Drive® is designed to give you fingertip control allowing you to adjust the speed control for greater accuracy.

### Select Drive

The all new Select Drive additionally allows you to set a constant speed for relaxed mowing with increased comfort.

### Hydrostatic Drive

Hydrostatic Drive gives you greatest accuracy and a smooth, stepless speed control.

### Engine Pro Spec

Designed using steel and cast iron, these engines are built for more robust work.

### Versamow™ Selective Mulching System

With a single lever, Honda's Versamow™ system will either collect the grass cuttings into the bag or finely shred and blow them down into the lawn to create a natural fertiliser.

### Versamow™ Variable Mulching System

With a single lever, Honda's Versamow™ system will collect the grass cuttings into the bag or finely shred and blow them down into the lawn to create a natural fertiliser or the perfect mix of both.

### Optiflow

A fan improves air flow between the cutter deck and the high air flow grass bag. It significantly improves collecting performance of the lawnmower.

Available on HRE 370 and HRE 410 only.

### Cordless

Efficient performance and sustained power thanks to our latest combination of battery and motor technology, so the lawnmower can keep going as long as you can.

## Roto-Stop® blade stop system

This feature enables you to release the blade engagement control which stops the blades, without turning off the engine. It allows you to move obstacles such as debris or toys from your mowing path, empty the grass bag or even cross over paths or driveways safely without the need to restart the engine.

## DECK MATERIALS

With three deck materials to choose from there is sure to be one to suit your needs.

### Pressed steel, powder coated decks

As featured on the HRG series, these are built for durability and performance. They are lightweight for easy manoeuvrability whilst still being hard-wearing and resistant to deterioration from corrosion and UV rays.

### Polystrong & Xenoy decks

As featured on the HRX series, these are both very strong, durable polymer materials which are highly resistant to UV, corrosion and dents.

### Cast aluminium decks

Featured on the HRH and HRD series, these offer exceptionally high strength to weight ratio and resistance to corrosion.

## TRANSMISSION TECHNOLOGY

Self-propelled lawnmowers make mowing the lawn easier, and Honda has three variable speed technologies: SMART Drive®, Select Drive and Hydrostatic drive.

### SMART Drive®

SMART Drive® is the latest self-propelled technology that provides subtle fingertip control, for accuracy around flowerbeds and borders.

### Select Drive

Select Drive is a clever feature that enables you to set a constant speed whilst mowing, giving you a more relaxed and comfortable experience.

### Hydrostatic Drive

Honda's innovative Hydrostatic Drive gives you greater accuracy by providing smooth, stepless speed control.

## HONDA MULCHING

### Micro cut twin blade system

Two stacked, offset blades cut grass into small clippings which decompose quicker, giving a better result when mulching. They also take up less room when collecting, meaning less frequent emptying of the grass bag.

### Versamow™ selective

Switching between mulching, collecting or discharging is simply achieved by adjusting a lever. There is no need to insert a separate mulching plug when you wish to mulch, this capability is integrated and can be activated or deactivated quickly, easily and safely.

### Versamow™ variable

This system allows you to switch between mulching, collecting or discharging modes, via the easy to adjust lever. You can also control how much grass is collected or mulched. There are seven positions ranging from full collection to full mulching with five variable positions in-between, giving you any combination of the two. As the system is fully integrated, no additional tools or attachments are required.

Optiflow\*

\*Available on HRE 370 and HRE 410 only.

## SPECIFICATION

### HRE 330 PLE

### HRE 410 PE\*\*

CUTTER DECK	CUTTER DECK
<b>33cm</b>	<b>41cm</b>
MOWING AREA	MOWING AREA

**HRE** electric lawnmowers

Electric, light & easy to handle

**Perfect for smaller gardens, our HRE range is powerful enough to cut your lawn with ease and light enough to be handled just as easily. With a choice of three different blade sizes, you can find the right one to suit your garden.**

Each model has an easy to operate, five position cutter deck height adjustment control, so that you can achieve a perfect cut every time by selecting the ideal height to suit your grass.

The HRE 370 and 410 models both feature our unique Optiflow system. This utilises a specially designed fan, fixed to the blade, creating a powerful, controlled airflow that maximises grass collection.

A magnetic blade brake clutch system is conveniently operated from the main handle, making it easy to engage and disengage the cutting blades. Whilst an integrated cable loop system keeps the cable out of harms way.

izy-ON cordless lawnmowers

Power without compromise

Easy start push button

Cutter deck height adjustment

Versamow™ Selective Mulching

**Driven by a powerful brushless motor and new battery technology, our izy-ON sets the standard for cordless lawnmowers.**

Built around a robust steel frame and best-in-class pressed steel cutter deck for outstanding durability, (it is an optional upgrade) the izy-ON lawnmower can offer a single-speed\* transmission to ensure sustained cutting power at a comfortable walking speed, and because it's lightweight, it can turn in the tightest of spaces.

Built to avoid clogging and reduce maintenance, it includes a high-air flow collection bag to maximise pickup, flexible cutter height adjustment and Versamow™ with Selective Mulching\* available, so it can adapt to any gardener's needs. Certified to IP54 for weatherproof, it lets you cut wet grass in complete safety. You don't even need to stop if it rains.

The izy now features brand new GCVx engines, which are lighter, quieter and more efficient. The new engines are even easier to start, whatever the conditions, thanks to a new auto-choke system. They are even more tolerant to lower quality fuels, especially after long periods without use. The oil drain, spark plug and air filter have all been made easier to access, for quicker and simpler maintenance.

Lightweight, robust and easy to use, the izy can turn in the tightest spaces making it perfect for small to medium sized gardens. The range includes the choice of either push-type, single speed or SMART Drive® self propelled machines.

The pressed steel, powder coated cutter deck is lightweight for manoeuvrability, whilst extremely hard wearing and resistant to deterioration from corrosion and UV rays. To optimise the collecting performance, all izy mowers have high airflow collection bags which maximises grass pick-up.

\*Available on selected models only, please see table below for details.  
 \*\*Available on HRX 537 HZE model only.

## HRX petrol lawnmowers

# Enjoy the choice

The HRX is a wide range of technologically advanced mowers, all you have to do is pick the one that is right for your lawn.

**The new HRX 476 and HRX 537 have been designed around you, making your life easier and a little more enjoyable.**

Our range is the result of over 40 years experience and features a host of unique Honda technologies; such as Select Drive for precise control, Versamow™ for selective mulching and Roto-Stop® to safely disengage the cutting blades. Our new GCVx engines increase performance, maximise efficiency and benefit from reduced noise levels. All you need to do is choose the one that is right for your garden.

For smaller gardens, the HRX 426 models can suit your needs with a smaller cutter deck size but similar levels of performance and reliability.

HRX 476 VYE

\*Available on HRS 536 VKEA model only.  
 \*\*Available on selected models only, please see table below for details.

**Whatever the task, we have a full professional range to get the job done, the HRS for instance, is designed to make short work of long grass, mulching clippings and blowing them back onto the lawn. It also has the ability to eject grass clippings from a side chute.**

Our UM grass cutters are built for areas that are difficult to manage, like fields, orchards and roadsides. The free floating front wheels and hydrostatic transmission make work easy and safe.

Protected by a tough cast aluminium deck and a reinforced cutter deck handle, the HRD and HRH are built to take on the most demanding jobs time after time. Power comes from our Pro Spec GXV 160 engines (except HRD 536 TXEH), which have a durable cast iron cylinder sleeve and crankshaft, that runs on specially adapted bearings to extend its working life. They also feature dual air filters and an extra large 1.5 litre fuel tank for periods of extended use.

# World of Honda Power Products

Our Power Product range now offers a choice between clean Honda 4-stroke engines and cutting-edge electric motors powered by our Universal Battery System. That's because we're committed to making our products as user-friendly, fuel-efficient and reliable as we can - all without compromising performance. So however you prefer to work, there's a Honda Power Product for you.

## Power you rely on

Quiet, dependable and always ready to help, our comprehensive range of generators is trusted around the world. From equatorial jungles to research posts in the Arctic Circle, they provide versatile, powerful and reliable performance at a moment's notice. If you're looking for a backup power supply for your home or need assistance with outdoor activities, contact your local dealer and discover what our generators can do for you.

## AUTHORISED DEALER

### SALES SERVICE EXPERTISE

You deserve complete confidence that you've made the right choice, long after you've made the purchase. That's why we appoint our Honda Authorised Dealers with as much care as we build into our products.

Look for the seal of quality when you buy your Honda, or call **0345 200 8000\*\*** and we'll find the closest to you.

#### Sales

Our Authorised Dealers not only feature a comprehensive display of Honda products to see and touch, but they know our product range inside-out. Every one follows an extensive Honda training programme with regular refresher courses – so you can trust in their valuable advice and experience to help you choose the product that's just right for you and your needs.

#### Service

As well as offering the highest levels of after-sales service, our Authorised Dealers' factory-trained technicians perform a full Pre-Delivery Inspection (PDI) on every machine, and are fully equipped to keep your product in peak condition with cost-effective servicing. Of course, you can also be assured that only high quality, genuine Honda parts are used, with access to our 24hr parts delivery service for fast and efficient turnaround.

#### Expertise

Our Authorised Dealers are true experts in their field, often with years of first-hand experience under their belt. In fact, their knowledge and experience plays an important role in making sure that our Research and Development team is given feedback from our customers, so we can ensure that new and improved models continue to meet your future needs too.

## Unrivalled quality, for peace of mind

There's a simple reason why you'll see so many old Honda products still in use. **Ours are built better, to last longer.**

That's not just an idle promise. It's fact. Our enviable reputation for durability and reliability is supported by our cast iron warranty, covering both parts and labour.

Our warranty maintains the same value throughout its lifetime too – meaning the last day of cover is exactly the same as the first: solid and dependable.

These specification details do not apply to any particular product which is supplied or offered for sale. The manufacturer reserves the right to vary their specification, including colours, with or without notice at such times in such manner as they think fit. Major as well as minor changes may be involved. Every effort, however, is made to ensure the accuracy of the particulars contained in this brochure. Consult the Dealer with whom your order is placed for details of the specification of any particular product. This publication shall not constitute in any circumstances whatsoever an offer by the Company to any person. All sales are made by the Distributor or Dealer concerned subject to and with the benefit of the standard Conditions of Sale and Warranty given by the Distributor. While efforts are made to ensure specification accuracy, brochures are prepared and printed several months in advance of distribution and consequently cannot always immediately reflect either changes in specification or in some isolated cases the provision of a particular feature. Customers are always advised to discuss specific details with the supplying Dealer, especially if a selection is dependent upon one of the features advertised.
